

Shutdown of Visteon Supplier Portal on Covisint

This notice is to confirm that effective 1-Feb-2010, Visteon Corporation has implemented a new portal for our suppliers, replacing the current system administered by Covisint. The new Gateway to Visteon (G2V) Portal replaces all applications and documents previously accessible on Covisint. This does not affect suppliers to Automotive Components Holdings, LLC (ACH).

As part of this initiative, we have replaced two applications. The new Supplier Change Request (SCR) and vPay (replacement for ePayables) are now available on the G2V Portal. Access to these applications is via "myApplications" link on your my Visteon Supplier homepage after logging into your regional G2V link found on http://visteon.com/suppliers/current_suppliers.html.

Suppliers must have a Visteon Corporate Directory System ID (CDSID) and password to access the new G2V Portal. CDSID registration instructions can be accessed at: http://visteon.com/suppliers/current_suppliers.html. Your current ID and password for Report Card will not give you access to G2V. You must retain your Report Card ID and password as well as obtain a new G2V CDSID and password.

Questions about the new Visteon Supplier Portal should be directed to vspsecur@visteon.com. Thank you for your continued support.
